Introduction

This course on World Regional Geography introduces the latest ideas, concepts, and theories in geography while also developing a strong foundation in the fundamentals of world regions. It is an issues-oriented program that explicitly recognizes the vast geographic changes taking place because of globalization. With this focus we will join the many schools that consider globalization to be the most fundamental reorganization of the world's socioeconomic, cultural, and geopolitical structure since the Industrial Revolution. As a core course in the geography curriculum, it will assist the students in understanding and taking a critical perspective on two interactive themes: the consequences of converging environmental, cultural, political, and economic systems inherent to globalization and the persistence — and even expansion— of geographic diversity and differences in the face of globalization. These two opposing forces, homogenization and diversification, will be permanently revisited over the course.

Required textbook and supplementary materials

Rowntree, L.; Lewis, M.; Price, M.; and Wyckoff, W. (2017). *Globalization and Diversity: Geography of a Changing World*, Fifth Edition. Hoboken, NJ: Pearson.

You can purchase a regular version of the text from a source other than the bookstore. Check out half.com (<http://www.half.ebay.com/textbooks>) and the Internet for affordable used copies of the textbook.

A UM Moodle course supplement has been established for this course. Access is from the University's webpage (<http://umonline.umt.edu/>). Especially see the Study Materials section for supplemental study materials.

Course Requirements

Quizzes	65 percent
Research paper	35 percent
Total	100 percent

You will complete a number of assessable activities during the semester, to assist and evaluate your understanding of the course material. Any work produced must be original.

A total of 13 quizzes (10 questions each) will be offered through the semester, to be completed in the class period. Quiz format is a combination of multiple choice/true-false answers, short answers and location of a number of features on a map. Questions will refer to content in the textbook and/or treated in class.

The research paper (~4,000 words) will consist of a literature review about the geography, history and present conditions of one of the regions in the course program, to be submitted on Moodle by December 20th, 11:55 PM.

Guidelines to prepare the quizzes and the research paper will be provided on the course Moodle site.

On quiz days, bring your Griz card, a ball pen, a pencil and an eraser. You should not need more for the quiz. At the time of the quiz you may not use anything else, which includes your cell phone, ball caps and other hats, books, notebooks, etc.

Grading

The best individual strategy to ensure that you receive a grade you can live with is to work to meet and/or exceed course requirements. Remember, A's are rewards for Superior Performance, B's for Above Average Performance, and C's for Average Performance.

Course grades will be based upon the following percentages of the total points possible for the course, as weighted by the criteria specified in course requirements.

A	< 93.0%		C	73.0-76.9%
A-	90.0-92.9%		C-	70.0-72.9%
B+	87.0-89.9%		D+	67.0-69.9%
B	83.0-86.9%		D	63.0-66.9%
B-	80.0-82.9%		D-	60.0-62.9%
C+	77.0-79.9%		F	< 59.9%

Additional Policies

Course engagement and in-class quizzes will require your presence in class. I will not allow make-up exams unless notified beforehand of the problem at hand. You should inform me of necessary or planned absences in advance of those. Absences related to occasional or protracted illnesses can be excused, and work made up, with proper notification and documentation (also see below for exam make-up policy). In short, be prepared to provide documentation for events causing absences if you wish extensions/makeups.

All students at the University of Montana must practice academic honesty at all times. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. All students need to be familiar with the Student Conduct Code. The Code is available for review online at http://www.umt.edu/vpsa/policies/student_conduct.php

It is extremely disruptive to have students arrive late and/or leave early, aside from the fact that full attendance of the student is expected in this in-class course. Not only will your presence throughout the entire class period keep me happy, it will help you to understand the material better. Please let me know in advance, as far as possible, that you might be arriving late and/or leaving early. In the event of that happening, please try to take a seat that is close to the classroom door so your disruption is minimal.

Cell Phones: **OFF**, or on vibrate mode if you subscribed to the University's Emergency Notification System.

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification of the course materials.
