### **Learning Outcomes**

Upon completion of this course, a student will be able to:

- Explain the meanings of whole numbers, integers, fractions, and decimals, as well as representations of those numbers;
- Explain the meanings of operations and the connections between those operations, concepts, and procedures in doing computations (using both standard and nonstandard algorithms),
- interpret story problems, and write story problems;
- Evaluate the efficiency of and use various representations of numbers and operations, as well as their applications to problem solving;
- Employ various modeling strategies to solve problems in real world contexts;
- Recognize some common misconceptions and be able to understand the faulty reasoning behind those misconceptions;
- Explain their reasoning, both verbally and in writing, while solving problems.

Course Agenda: We will cover material from chapters 1-6.

Other Information: *Academic misconduct* is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. Academic misconduct is defined as all forms of academic dishonesty and the Student Conduct Code. In particular, Student Conduct Code Section IV.a.5 identifies

the following violations: Submitting false information: Knowingly submitting false, altered, or invented information, data, quotations, citations, or documentation in connection with an academic exercise

*Students with disabilities* may request reasonable modifications by contacting me. The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students (DSS). “Reasonable” means the University permits no fundamental alterations of academic standards or retroactive modifications. ### **Grading Distribution:**

Homework Quizzes:	105 (15 x 7)
Project:	55
2 Mid-term exams	200 (2 x 100)
Final exam	140
<b>Total:</b>	<b>500</b>

**Grading Scale:**90-100 A ; 80-89.9 B ; 70-79.9 C ; 60-69.9 D ; Below 60 F

You must earn a C- or better in this course to pass the requirement in the School of Education. You may change to Credit/No Credit up the last day of the class. Credit will be awarded to students earning a D- or better. However, if you choose this option the grade cannot be counted towards the School of Education requirement nor the UM graduation requirement

### **Endnotes:**

**Homework Quizzes/Labs:** There will be homework assigned on a regular basis, which will be reviewed in class on Fridays. Expect to receive 7 “spot” homework quizzes over the course of the semester- These will NOT be announced ahead of time.

**Project:** I will assign a project over Moodle, which will involve “story problems and the teaching of fractions”. Periodically supplementary materials will also be made available on Moodle. Stay tuned for more details.

### **Mid-terms and Final**

Mid-terms 1 and 2 will be given approximately 1/3 and 2/3, respectively, of the way through the semester. The final will be cumulative in the traditional sense. It will be longer than the mid-term exams and will feature some questions relating directly to material taught earlier in the course.

### **SOME “FREE” ADVICE**

*Factors that affect your grade*

- Homework: There will be homework assigned on a regular basis, which will be reviewed periodically in class. It is your prerogative to keep up with the material.
- Attendance: Students are expected to attend class, and although class attendance is NOT a component of the course grade, absences will impact your performance since you will miss the material covered in the lectures. Late assignments will not be accepted.
- Make-ups: THERE ARE NO MAKE-UPS regardless of the reason. Exam make-ups will ONLY be given under special and extenuating circumstances, such as a death in the family or illness, provided that: a note from the Health Service or doctor is furnished by the student AND permission is given by me prior to the exam. The final exam is compulsory and no exceptions can be made about the date/time at which it is held- this is decided a priori by the University Administration.

The Final exam is scheduled from 8.00-10.00, Tuesday December 20

Come to class, work hard, participate in the planned activities, and you will do well in this course. Good luck and welcome to 132.
