

Goals: This course will examine the coordination chemistry of metals with a focus on structure, bonding of ligands, electronic spectra and the role of metals in biological systems. Concepts in atomic structure, molecular symmetry, and molecular orbital theory will provide the underpinnings for developing an understanding of the chemistry of metals and how it contrasts with carbon-based chemistry.

When: Monday, Wednesday, and Friday from 3:00 to 3:50 pm, in Chem 102

Instructor: Bruce Bowler, Chem 310, 406-282-1883, bruce.bowler@umontana.edu

Office Hours: Tuesday, Thursday, 3:00 to 3:50 pm, Chem 310, or by appointment

Text: Shriver and coauthors, Inorganic Chemistry, 6th ed., Freeman

Text website: [Textbook Student Website](#)

Course website: [Moodle](#)

Evaluation:

a) three 1-hour in-class exams – 100 points each	50% of grade
b) three quizzes – 40 points each	20% of grade
c) 2-hour final exam – 200 points	30% of grade

Course Content and Exam Date Overview:

Topic	Text
Atomic Structure	Chap. 1
Simple Bonding Theories	Chap. 2.1-2.3
Symmetry and Group Theory	Chap. 6.1-6.5, 6.9
Exam 1 (Friday, Sept. 30)	
Molecular Orbitals	Chap. 2.4-2.11 and 6.6-6.10
Coord. Chem.: Structures & Thermodynamics	Chap. 7
Exam 2 (Friday, Oct. 28)	
Coord. Chem.: Bonding and Electronic Spectra	Chap. 20
Biological Inorganic Chemistry	Chap. 26
Exam 3 (Friday, Dec. 2)	
Biological Inorganic Chemistry	Chap. 26
Inorganic Chemistry in Medicine	Chap. 27
Final Exam (Wednesday, Dec. 14, 1:10 - 3:10 pm, Chem 102)	

Course Notes:

- All quizzes are on Mondays. Quizzes (25 minutes) will be given at the **end** of class.
- Quizzes will test material covered since the previous exam.
- All Hour Exams are on Fridays.
- The Final Exam is comprehensive. It is on the Wednesday of Exam Period (Dec. 14, 2016)
- Suggested problems will be assigned weekly on Fridays. Homework problems are meant to reinforce lecture material. They will not be collected or graded. Answers to these problems are available in the Solutions Manual (available at the UM Bookstore).
- The course website is on Moodle. Login at: [Moodle Login](#). The course syllabus, lecture notes, practice exams, and answers to quizzes and exams will be provided on the web site.
- If you have a legitimate conflict with an exam/quiz date, you must inform the instructor **at least 1 week before** the exam/quiz to make alternate arrangements.
- Missed quizzes or exams will receive a grade of zero.
- The \pm grading system will be employed.
 - See the [Catalog for Academic Policies and Procedures](#) which includes grading policies
- See the [Student Conduct Code](#) for the definition and potential consequences of academic misconduct and plagiarism.
- Information on disability accommodations is available on the [University of Montana Accessibility Website](#).
- Last date to drop on CyberBear without a fee and with a refund is Monday, September 19, 2016 by 5:00 pm.
- Last date to drop without a petition is Monday, Oct. 31, 2016 at 5:00 pm. An add/drop form is required and a "W" will be assigned. After this date a signed petition must be obtained and a grade of WP or WF will be assigned. A fee of \$10 is assessed for each add/drop after September 19, 2016.
- Courses may not be dropped after Monday, December 12, 2016 at 5:00 pm. More details on add/drop policies are available in the [Important Dates and Deadlines PDF file](#) on the Registrar's website.

Tentative Schedule:

Month	Date	Day	Topic	Reading
August	29	M	Overview of Inorganic Chemistry	
	31	W	Bohr atom, Heisenberg uncertainty, Schrödinger Eq.	1.1, 1.2
September	2	F	Particle in a box, Quantum numbers	1.2, 1.3
	5	M	Labor Day Holiday, no class	
	7	W	Orbital shapes, Pauli exclusion, Shielding	1.3-1.5
	9	F	Periodic trends, Lewis theory	1.6, 1.7, 2.1, 2.2
	12	M	VSEPR theory	2.3
	14	W	VSEPR theory, Symmetry and point groups	2.3, 6.1
	16	F	Symmetry and point groups	6.1
	19	M	Quiz 1; Character tables	6.2
	21	W	Character tables	6.2
	23	F	Character tables	6.2
	26	M	Applications of symmetry	6.3-6.5
	28	W	Applications of symmetry	6.3-6.5, 6.9
	30	F	Hour Exam 1 (Chapters 1, 2.1-2.3, 6.1-6.5, 6.9)	
	October	3	M	Molecular Orbital theory,
5		W	Homonuclear diatomic molecules	2.8
7		F	Heteronuclear diatomics	2.9, 2.10
10		M	Triatomic molecules	2.11
12		W	Triatomic molecules	2.11
14		F	Tetraatomic molecules	6.6-6.10
17		M	Quiz 2; Coordination chemistry, structure	7.1-7.6
19		W	Coord. Chem., structure	7.1-7.6
21		F	Coord. Chem., nomenclature	7.1-7.6
24		M	Coord. Chem, isomers and thermodynamics	7.7-7.15
26		W	Bonding, crystal field theory	20.1
28		F	Hour Exam 2 (Chapters 2.4-2.12, 6.6-6.10 and 7)	
31		M	Bonding, crystal field theory	20.1
November	2	W	Bonding, crystal field theory	20.1
	4	F	Bonding, ligand field theory, octahedral complexes	20.2
	7	M	Bonding, ligand field theory, octahedral complexes	20.2
	9	W	Bonding, ligand field theory, 4 coordinate complexes	20.2
	11	F	Veterans Day Holiday – no class	
	14	M	Quiz 3; Spectroscopy, Introduction	20.3
	16	W	Spectroscopy, term symbols	20.3
	18	F	Spectroscopy, correlation diagrams, selection rules, charge transfer bands	20.4-20.6
	21	M	Spectroscopy, Tanabe-Sugano diagrams	20.4
	23	W	Thanksgiving Holiday, no class	
	25	F	Thanksgiving Holiday, no class	
28	M	Spectroscopy, Tanabe-Sugano diagrams	20.4	
30	W	Biological Inorganic Chemistry	Ch 26	
December	2	F	Hour Exam 3 (Chapter 20)	
	5	M	Biological Inorganic Chemistry	Ch 26
	7	W	Biological Inorganic Chemistry	Ch 26
	9	F	Inorganic Chemistry in Medicine	Ch 27
	12	M	Inorganic Chemistry in Medicine	Ch 27
14	W	Final exam, 1:10 – 3:10 pm, Chem 102
