COURSE DESCRIPTION

PSCI 505 is designed to allow graduate students to develop an understanding of public budgeting and financial management. A wide variety of topics will be covered including a survey of the major literature, theories of public finance, major figures, and the politics of budgeting. The class will include a survey of the historical development of budgeting in the United States, beginning with the classical period of PA through the contemporary era. A special emphasis will be given to comparing differences between public and private sector

budgeting and financial management. The political context in which budgeting occurs will also receive special attention. Although **PSCI 505** is a "survey course", the course will blend theory and practice. Students will be exposed to the dynamics of the budgetary process (i.e. budget development, budget execution, etc.) and will develop skills that can be taken directly to a job. The course requirements (described below) include analyzing a government budget. *Please note that the focus of this class is NOT about writing budgets; the course focuses more on general public budgeting and the politics of budgeting.* The main textbook, **Public Budgeting Systems**, is an extensive text and a number of chapters are omitted for this class.

PSCI 505 seeks to achieve three primary objectives. The *first objective* is to provide students with a general understanding of public budgeting by reading and discussing classic and contemporary literature. Students will be exposed to the basic theories, concepts, and terms associated with the budgetary process. Students' proficiency will be assessed via class discussions. The *second objective* is to enhance students' ability to write concise reports about budget and financial subjects. This objective will be accomplished by having students write and orally present article summaries. The *final objective* involves analyzing a real government budget, writing a report. Students' proficiency will be assessed via the written report and the formal presentation to the class.

Upon completion of **PSCI 505**, students should be able to:

1. Demonstrate knowledge of the history, evolution, and development of public budgeting in the United States
2. Demonstrate knowledge of the fundamental terms and concepts associated with public budgeting
3. Demonstrate proficiency at writing concise reports that deal with complex material
4. Demonstrate the ability to analyze a public budget
5. Demonstrate the ability to make a formal presentation of a budget

COURSE REQUIREMENTS

The general requirements include a research project (budget analysis), a formal presentation, and participation (which include the article summaries). The grade weights are specified below. All work is due May 3 -- the last day of class prior to exam week. All work will be returned during Exam Week.

Research Project..... 80% (Paper due May 6; presentations are scheduled for the last weeks of class) *This grade consists of a written report (40 percent) that analyzes a public budget and the formal presentation of the report (40 percent). The sessions needed for presentations depend on the size of the class. If necessary, we can use exam week.*

Participation 20% (Based on written and presented Article Summaries from the Hyde book; due when presented in class. These articles will be assigned on the first night of class).

Attendance and Participation: Students are encouraged to attend and participate in class discussions. Poor attendance and poor quality or lack of participating in class in class discussions may affect one's final grade. **Students are expected to miss no more than three classes during the semester.**

Article Summary Guidelines

Each student must complete written and oral article summaries. **They are due when presented in class.** *Sample article summaries are posted on Moodle.*

1. What is the major subject and theme of the article?
2. What is the major question the author addresses?
3. What techniques, tools of analysis, or methods are employed to answer the question?
4. What major points does the author make?
5. What does the author conclude? What suggestions are made?
6. What is the relevance of the article to theory or practice? (What does it mean?)

Budget Analysis Paper and Presentation

This project involves selecting a budget and writing a 10 to 15 page analysis. The purpose of the project is to provide an opportunity for students to analyze a "real" government budget. Students should select a government budget of personal interest and perform an analysis using some of the tools and methods covered in the class. Typically, papers contain an analysis of sources of funding (revenues) and expenditures. Additionally, papers often contain a description of the politics of the budget. **Do not pick a budget that is too large.** Often students select a single department of a city rather than the whole city budget because the budgets of cities the size of Missoula are simply too large to effectively analyze in such a short paper. The budget can be a nonprofit agency.

Sample budget papers from the previous classes are posted on Moodle. This is a **sample paper** and is not intended to be template that everyone has to follow. In the campus version of this class, there is also a **budget presentation** where students use PowerPoint or similar software for a 20-minute presentation. The purpose of this project is to produce a document that you would present to a city council, city manager, etc.

There is also one of my own papers that I do each year on the Montana state budget for a roundtable at the Annual Meeting of the Western Political Science Association. You will note that it is short and covers a whole state. Each year I write a paper about the Montana State budget, and some of these papers are posted on Moodle.

Some additional basic guidelines that might help you with the paper are posted on Moodle. Until recently (this year), I could post direct links on the online syllabus on the political science website. This year UM changed our website to a secure server and I can no longer use our website to post materials. Thus, everything is posted on Moodle.

The National Debt and some important statistics

One of the most widely discussed topics in government budgeting and finance is the size of the national federal debt, which was **\$19.9 trillion** (December 2016). For a comparison, the debt of the nation -- public and private -- is shown below. Please note that the size of the private sector's debt is much larger than the national public debt. There is a national public debt clock that shows updated figures at http://www.brillig.com/debt_clock

The TOTAL debt of the nation (public and private) is roughly \$70 trillion (October 2015); 80 percent of the debt has been created since 1990. Recall that the 1990s were "boom years" but much of the boom was built on increased debt.

Public Sector Debt

Federal Government Sector debt - \$19.9 Trillion (December 2016)

State & Local Government Sector debt - \$4.0 Trillion

Private Sector Debt

Household Sector debt \$17.5 Trillion
Business Sector debt - \$14.5 Trillion
Financial Sector debt (domestic) - \$16.5 Trillion

* The figures shown above exclude some types of debt. For many years China was the largest holder of U.S. debt and then China is became the largest holder of U.S. debt at \$800 billion. But in December 2009, China reduced its holdings and Japan became the largest hold of U.S. debt again at nearly \$769 billion in U.S. Treasury bonds. As of October 2016, China was the largest holder of U.S. debt at \$1.1 trillion while Japan holds \$1 trillion.

Sources: Various government reports; some are cited at <http://grandfather-economic-report.com/debt-nat.htm>

The United States' **Gross Domestic Product** ranks first among the nations of the world at roughly \$17+ trillion in 2016. China ranks second with a GDP of about \$11 trillion; The European Union is the largest GDP (at nearly \$19+ trillion), but the EU is technically a block of countries rather than a single nation.
