Course Information:
Semester: Spring 2017
Section: Section 01
Meeting time: MWF 1:00-1:50
Classroom: LA 401
Credits: 3 credits
CRN: 30748

Instructor Information:
Instructor: Douglas Dalenberg
Office: LA 413
Email: doug.dalenberg@mso.umt.edu
Phone: 406-243-4406 (message only).
Office hours: M 10:00-10:55, MWF 12:00-1:00.

Course Description:
Modern macroeconomics is a broad and deep field. We will approach this course from an empirical perspective by focusing on the forecasting and time series tools applied by macroeconomists. Statistical software will be used to assist us in handling of complex empirical problems and to demonstrate the use of statistical software in time series economics. The ultimate objective of the course is to familiarize the student with the tools used in forecasting and time series analysis.

Prerequisites:
A statistics course such as STAT 216.

Required Texts:
Becketti, Sean, (2013), Introduction to Time Series Using Stata, College Station, TX: Stata Press.

Hyndman, Rob J. and George Athanasopoulos, (2014), Forecasting Principles and Practice, available online as an open source text at http://otexts.com/fpp/

Optional Text:

Optional Software:
Stata is available in LA 401 and in FA 210, but I will hand out information about the different purchasing options available, however, you do not need to purchase it. We will also use R which is open source and available in LA 401 and FA 210 and many other campus labs.

Moodle:
Data sets used in class and for homework will be available through Moodle.
Learning Outcomes:
Students who successfully complete ECNS 513 will be able to:
1. describe the forecasting techniques used by economists.
2. explain the issues associated forecasting in economics.
3. explain the issues associated with time series data.
4. perform and interpret the relevant techniques and tests associated with analyzing time series data such as ARMA models, ARCH models and VAR models.
5. demonstrate proficiency with the statistical software programs (Stata and R).

Assessment:
The weights for the course grade are:
- Quizzes 50% Every other Friday.
- Homework Problems 30% As assigned.

Late work is penalized with a deduction of points reflecting the cost it imposes on me. Work is considered late if I receive it after I have finished grading those assignments handed in on time. I will use plus/minus grading with 100-92=A, 91-90=A-, 89-88=B+, 87-82=B, 81-80=B-, 79-78=C+, 77-72=C, 71-70=C- 69-68=D+, 67-62=D, 61-60=D-, 59 and below=F.

Policies:
1. If you miss a quiz and you contact me prior to or immediately after the quiz, then we will make arrangements for dealing with the missing score (usually a make-up quiz). If I am not contacted promptly, then no makeup is possible.
2. If my office hours conflict with your schedule, see me for an appointment or try to catch me in my office by chance.
3. Whenever possible, and in accordance with civil rights laws, the University of Montana will attempt to provide reasonable modifications to students with disabilities who request and require them. Please feel free to setup a time with me to discuss any modifications that may be necessary for this course. For more information, visit the Disability Services for Students website.
4. Academic dishonesty will result in a score of zero for the work in question and possible university sanctions. All students need to be familiar with the Student Conduct Code.
5. The University sets deadlines for adding classes, dropping classes, changing grade options, and changing to or from audit status. These policies can be found at the Registrar’s web page while the actual dates for this term can be found on the Registrar’s calendar.
6. I do not take attendance. The consequences of missing class are reflected in quiz and exam scores. I take material for the quizzes out of lecture, so if you do miss class you will want to copy a classmate’s notes.
7. As a courtesy to your classmates, please set your cell phones on vibrate rather than ring and please leave the classroom to talk on a phone. You may text during class if it does not disturb those sitting near you and it does not disturb me. Absolutely no texting or cell phone use during quizzes or exams. If you believe that you will need to leave during class, please sit where you will not bother others as you leave. A classroom is a community, so I trust you will act as a mature and responsible citizen and treat each other with respect and courtesy. Please do not interfere with the learning of your classmates. I will ask you to leave if you are interfering with others’ learning and it would be very embarrassing for you.
**Calendar:**
This schedule of topics is subject to modification. All changes will be announced in class.
