### Grading:

1. Weekly in-class examinations: aural; oral; and written – 60%
2. Class presentations – 30%
3. Final examination: written – 10%

### Attendance:

An attendance roll will be kept and all students, without exception, are expected to attend all classes on time. Late arrivals will not be tolerated; if you are late without a valid reason, you may not join the class. Do not miss class. If you accrue more than four absences without valid reason, you will drop a grade. Missing four classes in succession will be taken to mean that you have dropped the class.

### Why Irish?

One of the functions of Irish Studies at The University of Montana is to educate students on the Gaelic foundations of Irish and Irish-American identity and to dispel long-held notions that the Irish are fundamentally part of the English-speaking world. Their categorization under this cultural rubric originated in the Tudor period and gained increasing currency over subsequent centuries to become a part of conventional wisdom, this despite clear evidence that the core elements of Irish identity are not, in fact, of Anglo-Saxon provenance but indisputably Gaelic. The popularity of Irish music, dance and the demand for instruction in the Irish language in the United States speak clearly to this fact. The failure to recognize the fundamental importance of Irish Gaelic culture to Irish identity has led to misunderstanding and bogus interpretations of the dynamics of Irish political and cultural life. Our program addresses these issues and introduces students to the language and the culture it sustained. New perspectives on the ideological

foundation of Irish Gaelic culture permits alternative interpretations of the 800 year long battle of civilizations, the Irish revival movement, the evolution of Irish nationalist politics and the creation of the modern Irish state. Access to Irish Gaelic culture begins with the language: knowledge of the language provides an insight to the Irish Gaelic mindset and opens up the door to Irish Gaelic literature.

## Objectives:

The primary objective of this course is to provide students with the foundational knowledge necessary to acquire the highest standards of fluency in written and spoken Irish. The course is taught according to the imperatives of a scientific methodology of language instruction known as *An Modh Díreach*. This pedagogical system was specifically designed to impart a spoken knowledge of Irish to students and is based on the following principles: 1) To understand and speak the language, a student must acquire a phonetic command of the language and therefore a special emphasis is placed on pronunciation throughout this course; 2) translation is discouraged and students are instructed to listen and repeat so as to develop the use of the ear as an effective tool for language acquisition; 3) good practices in language learning that not only teach the language but shows the student how to learn the language; and 4) meeting and working regularly together outside the classroom on oral and written assignments using the material from class in the manner shown by the instructor is the key to acquiring mastery of the Irish language.

Beginning Irish I introduces the students to the phonetic system of the language; it acquaints them with the proper usage of the two verbs 'to be,' familiarizes them with prepositional pronouns and their use in conjunction with the verbs 'to be,' in past, present, and future tenses; teaches them a vocabulary of over 200 words; introduces them to initial mutations as well as other peculiarities of Irish syntax and grammar. All instruction is supported by the use of songs and poems as well as conversational pieces that illustrate the proper usage of each particular aspect of language. Lessons are thematically arranged to form a graduated and integrated program so that on the completion of the course each student will be able to give an account of family, feelings and emotions, talents and abilities, residence, country of birth and nationality, occupation, food, clothes, weather, place of residence, and so forth.
