Course Description and Learning Objectives

This course surveys Montana history from the time of first inhabitants (13,500 years ago) to the present. • Develop a broad understanding of Montana history from earliest human settlement to the present
• Develop an in-depth understanding of several key aspects of Montana history: Native American cultures and contacts between Montana Indians and non-Indians, mining and industrial development, homesteading and rural life, and the state’s environment and landscape
• Develop intellectual skills, including the ability to read critically, think analytically, and write clearly
