PSYX 535: Child Interventions  
Spring 2020

Course location and time
Skaggs 303
Tuesday and Thursday 9:30 am – 10:50 am

Instructor information
Instructor: Jacqueline A. Brown, Ph.D., NCSP
Office: Skaggs 204
Email: jacqueline.brown@mso.umt.edu
Office hours: By appointment (send me an email to set up)

Course description
This course provides an intensive introduction to evidence-based psychological practices, treatment planning, and treatment components for a variety of problems that children and families experience in school and clinical settings. There will be an emphasis on cognitive-behavioral and behavioral approaches, given that the youth evidence base primarily consists of these modalities across problem areas. An overview of treatments for several conditions such as anxiety disorders, depression, disruptive behavior problems, and trauma will be covered. The focus of the course will be primarily applied and practical, although we will also focus on scientific issues.

Learning Outcomes
Throughout this course, students will:

1. Better understand what it means to be an evidence-based therapist and the importance of utilizing evidence-based treatments in therapy.
3. Develop skills in identifying and delivering evidence-based treatments and practices for specific problems.
4. Identify progress monitoring measures to use in conjunction with evidence-based treatments.
5. Increase their ability to effectively analyze/critique the evidence-base surrounding a variety of interventions and be aware of their theoretical basis.
6. Increase their comfort in delivering evidence-based treatments in the form of role-plays and being able to self-reflect upon their own performance.
7. Increase their awareness of diversity issues that must be taken into account and understood when providing services to children and families.

Readings and Materials

You are required to sign up for PracticeWise, which is a state-of-the-art intervention system. It is expected that you will gain introductory competence in treatment skills and best practices for a variety of child and adolescent diagnoses and behavior. This will be the only expense for this course.
The following readings will be provided to you in PDF format through Moodle. There may be additional readings assigned during the semester, but you will be provided with them in advance.

**Week 1**

**Week 2**

**Week 3**

**Week 4**

Whiteside, S. P. H., Deacon, B. J., Benito, K., & Stewart, E. (2016). Factors associated with
practitioners’ use of exposure therapy for childhood anxiety disorders. *Journal of Anxiety Disorders, 40,* 29-36.

**Week 5**

**Week 7**

**Week 8**

**Week 9**

**Week 11**

Week 12

Week 13

Week 14

Other Recommended Resources

Required assignments

All written assignments must be completed according to proper APA format.

1. **Class participation and role plays (50 points)**

   **Participation and Role Plays (30 points).** Participation in class assignments, activities, discussion, and readings is critical for learning in this course. I expect that you will come to class having read all of the required readings. Students will take part in frequent role-play exercises during each Thursday class. Role-plays will occur in small groups and a single dyad/group may be asked to perform in front of the class after practicing in their group. To be prepared for role-plays, students will be expected to review practice guides prior to the class and reference them in class. Furthermore, students will also be required to reflect upon the strategies in the practice guides, including what may be challenging for them and what may be particularly effective about the technique.
Final Role Play. A final video-taped role-play and accompanying self-critique will account for **20 points** of your course grade. Each student will serve as a therapist conducting a 30-minute evidence-based therapy session with a “client” presenting with a semi-scripted problem. The client can either be another peer in the class or someone else. After the session, students will prepare a detailed critique of their own performance, with time-codes for specific strengths and weaknesses. Your critique can either be paragraph or bullet format, as long as you make sure to be thorough in your critique. An example of what your self-critique MAY look like is posted on Moodle, but you are not required to follow this specific format. The grade for this portion of the class will be based on both the skills shown during the 30-minute session and the thoughtfulness and accuracy of the student’s own commentaries on her/his performance.

2. Presentation (40 points)

For your in-class presentation, you will select a treatment approach that we do not discuss in the course, one with a more limited evidence base. **A few rules:** The treatment must be specified for a particular child/adolescent problem (e.g., diagnostic category like depression or bipolar disorder, problem like delinquency, attachment difficulties, or self-injurious behaviors, etc.). The treatment could be one that appears promising from early research; however, you may also choose a treatment that is well-known and has limited research studies on it. In your presentation, you should discuss the existing research on the protocol or technique, and your audience should come away from your presentation with a good understanding of how to do the treatment, as well as any critiques of the protocol/technique that you may have revealed or developed during your research.

Your selection must be approved by the course instructor by **FEBRUARY 27, 2020.** Please submit a paragraph description by **email in a Word document** of the treatment/practice(s) including a brief description of it and a brief overview of your initial literature/online search. Once you are “cleared,” the assignment involves several steps:

1. **Describe the treatment in detail** so that it is clear you understand what the approach involves. Ideally, you will be able to describe the “course” of treatment—that is, how treatment would “appear and feel” to a client/family. You should be able to answer the following questions to the extent that this information is available (keep in mind that you may need to contact authors directly in a professional way):
   a. What treatment strategies are involved?
   b. Who is involved in the treatment?
   c. How does the treatment begin?
   d. How is it designed to conclude?

2. **Discuss the theoretical basis of the treatment**, including your understanding of the rationale for using the treatment for the population. Which theory (or theories) does the treatment draw on? Why does the treatment fit the problem area?
3. **Present the evidence base for the treatment**, providing a thorough examination of the available data about the treatment. The evidence base will include clinical studies that test the efficacy of the treatment. You may also want to review any basic research that would support the use of the approach. As an example, are there studies suggesting that the proposed treatment is relevant and effective for the problem area?

4. **Analyze/critique the evidence base**. Consider the study methods, including internal and external validity concerns, measurement issues, ethical concerns, and when needed, statistical analyses. A consideration of the evidence base with regard to diverse populations is warranted.

5. **Identify one progress monitoring measure relevant to the treatment**. If the treatment is meant to improve ‘attachment relationships,’ for example, what is an observable, measurable indicator of progress in the treatment.

6. **Identify future directions for research** on the treatment approach. What would it take to take the treatment to the next level? Should the treatment be taken to the next level? For example, if a treatment is ‘risky,’ that would suggest that some children are helped by the treatment and some are not—what would be required to improve the treatment so that it is empirically based and ethical, if at all?

Plan for your presentation to be approximately 25 minutes in length, allowing for 5 minutes for Questions/Answers, for a total of 30 minutes. Part of your grade for this presentation will include time management.

3. **Reaction Questions (10 points)**
   For two of the assigned readings (5 points per reading), you will be required to come up with one thoughtful question that arose as a result of your completing the reading and guide an in-depth class discussion surrounding that question (up to 10 minutes). The expectation is that you do all readings for each class, and the reaction questions will also be used to facilitate in-class discussion. **The reaction question for each reading will be due before the start of class and must be submitted to the instructor by email. Once approved by the instructor, the student will email their question to the rest of the class.** Make sure you have your questions on hand as well to reference it when initiating and guiding the discussion.

**Course grading**
Grades are determined based on straight percentages and are as follows:

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>94 – 100</td>
<td>A</td>
</tr>
<tr>
<td>90 – 93</td>
<td>A-</td>
</tr>
<tr>
<td>87 – 89</td>
<td>B+</td>
</tr>
<tr>
<td>84 – 86</td>
<td>B</td>
</tr>
<tr>
<td>80 – 83</td>
<td>B-</td>
</tr>
<tr>
<td>77 – 79</td>
<td>C+</td>
</tr>
</tbody>
</table>
### Course guidelines and policies

**Student Conduct Code**

Students entering the field of school psychology are held to a high standard of academic and professional honesty and integrity. The University of Montana Student Conduct Code (SCC) should be reviewed, especially in regards to plagiarism. It is the policy of the SPSY program that plagiarism will result in an “F” for the course in which the academic violation occurs, as well as grounds for consideration of dismissal from the program. The UM administration states: “All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University.” All students need to be familiar with the Student Conduct Code. Please take care to acknowledge your sources, including the Internet, using APA Style.

**Attendance**

Regular attendance and active engagement is required for all scheduled classes, as students are responsible for information covered in lectures, handouts, discussions, and activities. Attendance is stressed because students will have opportunities to (a) improve their knowledge through discussions of critical topics and issues, (b) practice skills needed to engage in professional communication with colleagues, (c) obtain information from lectures and presentations, (d) participate in activities, and (e) submit required assignments.

Please inform me prior to class if a late arrival or early departure from class is absolutely necessary. In the case of illness or absence (including religious observances), please send me an email and make arrangements before missing the class. For extended absences due to medical issues, documentation must be provided. Failure to do so may result in penalty. Absence for conferences is not automatically excused. You must be in good standing in the class and make arrangements for assignments before you leave.

**Electronic Devices**

All electronic devices other than computers must be turned off and put away before class. The use of computers during class to take notes or use electronic articles and PowerPoint presentations is allowed. However, students may not use any form of social media on their computer while in class or use computers for other personal reasons unrelated to the class content. I will speak to you if I feel your use of computers is interfering with your learning or is a distraction to other students. Inappropriate use of computers will result in a reduction in your participation grade in this course.

**Respect for Diversity and Appropriate Language**

I am committed to fostering a class environment in which all people will be treated and will be expected to treat others respectfully. People with disabilities or other elements of diversity are first and foremost individual people who should be treated with respect. Language used in

</tr>
</tbody>
</table>
assignments and class discussions should be respectful and professional at all times. Please use “people first” language in speaking and writing about people with disabilities or other elements of diversity. For example, please avoid phrases such as “the handicapped,” “LD kid,” “autistic child” or other statements that emphasize the disability or other elements of diversity first, rather than the individual. Pejorative terms and threatening or harassing language have no place in a respectful professional discussion or in your assignments.

**Disability Modifications**

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

**Assignment expectations**

Students are expected to submit assignments at or before the assigned due date (no later than the end of class). Prior notification is required for excused or late assignments. Unexcused assignments submitted after the due date will be penalized by a reduction of two points per calendar day late. It is the student’s responsibility to ask questions when information required in the assignments or discussed in class is unclear. There will be no make-up or extra-credit assignments.

The instructor reserves the right to modify or substitute coursework, including readings and assignments, during the course to enhance learning. These changes will not result in a substantially increased workload or decreased opportunities to earn points, but will instead likely benefit students.
## Course Schedule

The course schedule is subject to minor adjustments, as determined by the instructor.
