Course Description:
This course explores issues of gender and communication. We begin by examining the meaning of gender in our culture. Questions we will consider include: What is gender? How do people become gendered? What are some of the social, cultural, and political implications of our current gender systems? This will be followed with an investigation into how gender is displayed and perpetuated through our verbal and nonverbal interactions. Questions to be explored include: To what extent does gender affect patterns of interpersonal communication? What causes gendered patterns of communication to develop? What are some of the implications of gendered patterns of communication? The last portion of the course will be devoted to a discussion of gender and the media. Questions to be explored include: What are the effects of media on our experiences of gender? How have feminisms, men’s movements, and gay rights movements affected representations of women, men and sexualities in television and other media outlets?
