PSCI 220: Introduction to Comparative Government
Spring 2020
MWF, 10:00-10:50 am, LA 11

Abhishek Chatterjee
Email: Abhishek.chatterjee@umontana.edu
Office Hours: Mondays, and Fridays 11:30 am-12:30 pm; or by appointment
Office: Liberal Arts 355

Course Description and objectives
As the title indicates, this is an introductory course in a sub-field of political science that tends to study the
“politics,” and “government” of various countries—including the United States—“comparatively.” The quotes
around some of the words above indicate that we will be collectively thinking a bit more deeply than perhaps
usual about these terms. So for instance we shall be asking about both, what constitutes “politics” or
“government,” and why we need to “compare” to understand politics and government. We will discover that
the study of comparative politics includes the investigation of questions such as, “why are certain states
‘democratic,’ and others ‘authoritarian?’” and “why do certain countries have governments that can easily tax
people, educate, and even relatively swiftly punish citizens, while others struggle to do all three?” and a final
example, “why is the difference between the rich and the poor greater in some countries than others?” in each of
these examples—as in many others—we aim to derive some general propositions about (roughly speaking) the
causes of, respectively, democracy and authoritarianism, strength or capacity of governments to do things, and
income and wealth inequality. It further turns out that comparing is an especially good—perhaps even natural—
way of answering certain general questions about the social and political world. We shall therefore also try to
learn what it means to rigorously and systematically compare, and perhaps start developing the habit ourselves
when we ask similar questions.

None of the above precludes learning about particular countries; indeed it allows one to ask “good” questions
about the countries one is interested in, and as such provides a framework for learning. It is for this reason that
instead of focusing on a particular group of countries, we will range widely across time and space in ways that
illuminate the questions we ask.

Requirements
Reading assignments should be completed by the date listed on the syllabus. You are expected to attend every
lecture. Note that the lectures are very important because many of the readings are not necessarily self-
explanatory.
Your grade will be based on the following assignments:
1. **10%** of your grade will be based on a weekly/biweekly writing assignment. These assignments will not be
   graded; that is, you will get full credit as long as you complete them in the manner described as follows. You
   are required to write a brief (about one page) summary of the readings marked below with an asterisk. These
   summaries should be tightly compressed, concise summaries of the main arguments of the readings. In your
   own words, you should state the main claim of the reading: what is the phenomenon being discussed? What are
   the main concepts employed? And what are the main hypotheses proposed by the author? I think you will find
   that writing these short papers is excellent exercise: it will force you to concentrate while reading, and you will
   find that, with practice, you can distinguish between central and peripheral material and focus on the former,
even while reading difficult articles. And, if all that were not enough, when it comes time to study for
examinations, you will have summaries of many of the readings at your fingertips. As long as you make a good
faith effort to capture the essence of the readings, you will receive full credit. You are to hand these at the
beginning of the lecture under which it is listed. Finally note that you don’t have to do the assignment every
2. 30% of your grade will depend on a take home midterm exam due on March 13 (I will email you the exam or post it on moodle on March 6)
3. **30%** of your grade will be based on a 5 to 8-page group paper to be presented by each group (of around 5 students each). The paper will be of the nature of a research design, or a research proposal where each group will come up with a research question, justify why it’s worth pursuing, and finally sketch out what will be involved in pursuing it. Preliminary drafts of these papers, in turn will be ‘judged,’ or reviewed by your peers (other groups), after which each group will revise their papers, and present the final version in class during the last week. The presentation will, among other things, explain how each group addressed the comments of their peers. I will provide rubrics for evaluating the research questions. To help you stay on track, the paper will be done in stages. In stage one, each group comes up with a clear research question, and circulates it among the rest of the class. In the second stage, each group revises its research questions, and/or responds to feedback it receives from the other groups (each group receives three sets of comments), does the literature review (see below), and describes how the project will be completed. In stage 3, each group receives another 3 sets of comments, and then revises its paper accordingly. In the final stage, each group will write up their final version of the paper, and circulate it among the other groups prior to presenting them in class. **Stage 1 will be on February 24; you will receive feedback on your research questions on February 28. Stage 2 will be on March 25; you will receive written feedback by April 1. On this day (April 1) we will also discuss your proposals in class. The final versions of the papers should be circulated by April 29.**

We will talk more about this assignment in class, but the research design should generally have the following components:

- **A statement of the research question**, which addresses the following questions: (1) why is the question important, given the present state of knowledge? (2) How does the question fit into current conversations/ arguments; if it does not, why should the question be included? As will be discussed in class, research questions arise from a consideration of the merits of existing information, observations, or currently held beliefs. Are the current beliefs well supported? If not, what are the alternative ideas? Given these ideas, what are some logical next questions? You will need to provide context and evidence for your assertions such that your peers (who may not be as informed or interested in your chosen topic) are able to appraise your ideas. This means, among other things, citing references that support your ideas. (**This part comprises Stage 1**)
- **A literature review**, which succinctly summarizes what, if anything, has been written about the question, and what have been some of the approaches to answering it (if any). The review should also point out—if possible—some of the shortcomings of the extant ways of either looking at/conceptualizing and/or answering the question.
- **A summary of the alternative argument** that explains how it improves on or adds to the existing debate. Remember that this does not have to be the “final” argument; it can be an interesting alternative argument that illuminates a new aspect of the question or makes one think differently about it (of course you will have to say why it should be “interesting”).
- **A description of how the project will be completed**, which addresses the following questions: (1) what kind of evidence will be advanced to support the argument (for instance, will there be a case study, or some kind of comparative study)? (2) Why is such evidence appropriate for the question asked? (3) How will such evidence be collected?

The evaluation rubric for the research design (which I will be providing will use the following criteria):

- Does the research proposal contain the components enumerated above? If not, is there a good reason not to include all of them?
- Is the question clear? Is it precisely stated?
- Is the project realistically achievable, say as a part of a senior, or master’s (even doctoral) thesis?
- Is the writing clear and coherent? Are there too many spelling and grammatical errors? Are all the works properly cited?
4. 30% of your grade will depend on a take home, cumulative final exam, which is to be handed in (in the classroom) between 10:10 am and 12:10 pm, on Wednesday, May 1. I will email you the exam, or post it on moodle on April 29.

Readings
The following book has been ordered through the bookstore. All other readings will be available on moodle under the corresponding date/week listed in the schedule below.

Office Hours
You are all welcome-- even encouraged--to stop by, introduce yourselves, discuss any problems you might be having, talk about course material, and even, hopefully, argue about course material. I will also address specific questions sent to me by email. Please keep in mind, however, that I cannot summarize in an email the lecture that you missed.

Disability Services
The University of Montana assures equal access to instruction by supporting collaboration between students with disabilities, instructors, and Disability Services for Students. If you have a disability that requires an accommodation, contact either of us at the beginning of the semester so that proper accommodations can be provided. Please contact Disability Services for Students if you have questions, or call Disability Services for Students (DSS) for voice/text at 406.243.2243. You may also fax the Lommasson Center 154 for more information at 406.243.5330.

Academic Honesty
All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or disciplinary sanction by the university. All students need to be familiar with the [Student Conduct Code](#).
Schedule
Part I: Basic Approaches to Comparative Politics (and the social sciences in general)
January 13: introduction and overview of the class

January 15: Political or social ‘science’

January 17: No Class, I’m away

Part II: The State

January 20: No Class, MLK Day

January 22: Comparative politics and the comparative Method
- O’Neil and Rogowski, 3-7, 9-12, 18-22

January 24: What is the “state” and why is it important?
- O’Neil and Rogowski, 26-39

January 27: More about the state
- O’Neil and Rogowski, 39-57
- Walter C. Opello, and Steven J. Rosow, *The Nation State and Global Order* (Lynne Reinner, 1999), Introduction, and Chapter 4

January 29: Sovereignty, a closer look
- O’Neil and Rogowski, 68-74

January 31: Subjects/citizens and the state: exertion of power

February 3: How states make citizens, and (sometimes) vice-versa

February 5: Nationalism
- O’Neil and Rogowski, 77-85
- Michael Hechter, Containing Nationalism (Oxford University Press, 2000) 24-33, 56-69

Part III: The State and the Regime
February 7: Democratization, how and why?
- O’Neil and Rogowski, 203-12
- Walter C. Ope1Io, and Steven J. Rosow, The Nation State and Global Order (Lynne Reinner, 1999), Chapter 5.

February 10: Democratization: The historical background (in Europe)

February 12: Historical background, continued

February 14: Some general propositions
- O’Neil and Rogowski, 405-430

February 17: No Class, President’s Day

February 19: Authoritarianism, a closer look
- Walter C. Opello, and Steven J. Rosow, The Nation State and Global Order (Lynne Reinner, 1999), Chapter 6.
- O’Neil and Rogowski, 267-90

February 21: Contemporary authoritarianism
- O’Neil and Rogowski, 303-12

February 24: Democratization and authoritarianism, some puzzles

Journal of Democracy 14 (July 2003), pp. 30-44

February 26: Puzzles, continued
- O’Neil and Rogowski, 250-64
Part IV: Challenges to the state and regime  
February 28: Revolutions  
  •  *O’Neil and Rogowski, 316-30

March 2: Revolutions, continued  
  •  O’Neil and Rogowski, 349-63, 366-72

March 4: Review session for midterms

March 6: Civil wars (Midterms posted)
  •  Stathis N. Kalyvas, “Civil Wars,” in Boix & Stokes: The Oxford Handbook of Comparative Politics

March 9: Civil wars continued  
  •  O’Neil and Rogowski, 86-94

March 11:  

Part V: The state and the economy

March 13: Catch up day, no readings; Midterms Due

March 16-20: Spring Break

March 23: “Rich” states and their economies  
  •  Walter C. Opello, and Steven J. Rosow, The Nation State and Global Order (Lynne Reinner, 1999), Chapter 7  
  •  O'Neil and Rogowski, 440-48

March 25: Continued  
  •  O’Neil and Rogowski, 450-64

March 27: The wealth and poverty of nations  
  •  O’Neil and Rogowski, 137-59

March 30: Institutions and development, an example  
  •  *O’Neil and Rogowski, 160-80

April 1: Day to discuss paper drafts

April 3: Development and development strategies and another view on how the “rich” got “rich”  
  •  Ha-Joon Chang, “Kicking Away the Ladder”
April 6: Continued

April 8: Development strategies, successes, and failures
   • Vivek Chibber, Locked in Place: State Building and Late Industrialization in India (Princeton, 2003), chapter 1

April 10: Development, underdevelopment and growth
   • O’Neil and Rogowski, 547-69

April 13: Continued

Part VI: Globalization
April 15: What is globalization?
   • O’Neil and Rogowski, 595-608

April 17: Is globalization “new?”
   • Herman Schwartz, “Globalization, the Long View,” in in Richard Stubbs and Geoffrey Underhill, Political Economy and the Changing Global Order, Basingstoke: Palgrave, 2005

April 20: A critical view of globalization-talk

April 22: Globalization and the state
   • Walter C. Opello, and Steven J. Rosow, The Nation State and Global Order (Lynne Reinner, 1999), Chapters 11 and 12

April 24: Catch up day and/or wrap up

April 27: Review session for final exam, and class presentations

April 29: Class presentations

May 1: Class presentations

Final Exam: To be handed in (in class) on Wednesday, May 5th
