### **ACADEMIC POSITIONS:**

**Professor**, Department of Society and Conservation (2003-present).

**Chair**, Department of Society and Conservation (2015 - 2018).

**Director**, The Bolle Center for People and Forests, College of Forestry and Conservation, University of Montana, Missoula, Montana 59812-0576 (2004 - 2014)

**Editor-in-Chief**, *Society & Natural Resources* (2012-2014; three year term) [with Daniel E. Williams]

**Professor and Department Chair**, Department of Sociology (2001-2002), Professor (2000 - 2002); Associate Professor (1995 to 2000), Assistant Professor (1992 - 1995), Visiting Assistant Professor (1991-2). Adjunct Associate Professor (1996 - 2002), School of Forestry, The University of Montana, Missoula, Montana 59812-5184.

### **EDUCATION:**

**Ph.D., 1991** Cornell University, Rural/Development Sociology

Minors: Agriculture and Natural Resource Sociology and Southeast Asian Studies.

**M.S., 1984** Cornell University, Extension and Adult Education

Minors: Rural Sociology, International Agriculture and Southeast Asian Studies.

**B.A., 1978** Colgate University, Sociology and Anthropology, Graduated Cum Laude

### **TEACHING EXPERIENCE:**

Courses Taught: Society and Environment, Sociology of Environment and Development, Political Ecology, Community Forestry and Conservation, Rural Sociology, International Development and Globalization, Gender, Classical Social Theory, Cultural and Biological Diversity; Special Issues in Asian Agriculture and Development

### **RESEARCH FOCUS:**

My research focuses on the interconnections between social processes and ecological conditions, particularly rural livelihoods, land uses and natural resource management and governance (notably community-based). I am strongly informed theoretically by political ecology and agrarian political economy, and conduct in-depth research at the local village or community level while attendant to broader agrarian politics and factors influencing socio- environmental change. I often conduct research collaboratively with ecological scientists, organizations and rural residents. My research (conducted both in the U.S. intermountain west and across Asia) strives to provide critical analyses to inform socially just and resilient resource management using a variety of research methods (including participatory and standard social science approaches).

A current project involves exploration of community forest models in the U.S. and their applicability to developing community forests on three recently purchased properties in Montana and Washington. This work builds on prior research and development work surrounding corporate timber divestment in Western Montana and community-informed strategies for acquisition and disposition that contributes to local livelihoods and landscape-level conservation. This work has involved collaboration with several governmental and non-governmental organizations in Western Montana (notably USDA US Forest Service, The Nature Conservancy, Blackfoot Challenge, and Swan Connections).

Another project builds on work conducted over the last eight years on the social and ecological significance of historic livelihoods and land uses in Bhutan and their implications for natural resource management and rural livelihoods, including landscape biodiversity, policies to enhance fuelwood and other wood products on private and public forests (including community forests). These have been conducted in partnership with faculty at the Ugyen Wangchuck Institute for Environment and Conservation Research (UWICER) in Bumthang, Bhutan.

Over the last twenty-five years I have worked extensively in tropical forest management in and around protected areas, specifically related to community forestry, agroforestry systems (e.g. shade-grown coffee and cacao), non-timber forest products (especially rattan), community-based rural ecotourism, and participatory community assessment in forest-adjacent communities in Montana, Indonesia, Belize, and the Philippines.
